

Exercise set 6.4: Sinusoidal Models

Sketch the graph of the equation by translating, reflecting, compressing and stretching the graph of a known base function.

1. $y = 2 \sin x$

2. $y = \cos 2x$

3. $y = \sin(x + \frac{\pi}{2})$

4. $y = 1 + \sin x$

5. $y = 2 \cos x - 1$

6. $y = -2\sin(x - \frac{\pi}{2}) + 3$

7. What are the equations of the functions below¹?

¹ Hint 1: They are all based on $\sin x$.

Hint 2: Remember that $2\pi \approx 6.283$.
